Menlo Park Notebook #128 [N-80-00-06]

This is the second of three notebooks that contain the results of a search, conducted by Otto Moses during the summer of 1880, for literature relating to the electric light. (See also Menlo Park Notebooks #127 and #176.) The citations are listed in alphabetical order by author. There are two sets of listings, beginning on pages 2 and 210. The book contains 282 numbered pages.

Blank pages not filmed: 1, 278-282.

Albert, Dominique. 2.

Alderson, Dr. James. 3.

Allen, William & Wm Wasedine Pepys.

Allnaud (aîné), F. 2.

Carbon Process of carbonizing turf without close vessels, the peat furnishing its own caloric, without producing ashes. [1839]

Manch. Soc. Mem. VI., 1842, pp. 399–408.

" On an artificial formation of plumbago [1825]

Camb. Phil. Soc. Trans II. 1827 441–443.

" On the quantity of carbon in carbonic acid and on the nature of the Diamond.

Phil. Trans. 1807 pp. 267–292.
Bibl. Britann. XXXVI., 1807. pp. 313–344. Gehlen. Jour. V., 1808, pp. 664–689.

Affinity Reflections on the affinity or degree of tendency to combine which exist between mineral substances on coming into existence

Journ. of de Phys LIV. 1802 p. 390

—— 17. (see Gay-Lussac, 65)

Alter, D.

Altmütter O. J. G.

Andrews, Thomas. 10. 22.

Carbon. Analysis of a carbonaceous substance found in a porcelain furnace.

Annal. de Chemie IV., 1817, pp. 67–70.

Spectrum. Con- On certain physical properties of Light
bustion, produced by the combustion of different
of metals in the Electric Spark refracted by a
Metals prism.

Silliman Journ. XXVIII., 1854. pp. 55–57.

Loop. Platinum Wires. On preparing Wollaston's platinum wires.

Gilbert. Annal. LVIII., 1818. pp. 434–437

Loop. Gases. Cooling-pow. On the cooling power of the gases.

Irish Acad. Proceid. I. 1841., pp. 465–468

Vacuum. On a method of obtaining a perfect vacuum in the receiver of an air pump.

Phil. Mag. III. 1852. p. 104–108
Journ. de Pharmacie XXIII, 1853 p. 440–442
Poggen. Annal. LXXXVIII., 1853 p. 585–590

" Second note on Ozone.
4— Roy. Soc. Proc. IX. 1859. 606–608

Arnot, Neil. 3.

Ashby, J. Eyre. 1.2.

Attfield, John, 6.

Aubergier, Rector, 2.

Aubert, —

Faraday On the regulation of combustion.

Brit. Assoc. Rep. 1847. (pt. 2), p. 47-48.

Loop On so called, catalytic action and combustion; and theories of catalysis.

Roy. Inst. Proceed. II. 1854-58. p. 65-71.

Erdmann. Jour. Prakt. Ch. LXVII. 1856. p. 7

On the metallic and other oxides in relation to catalytic phenomena.

Roy. Soc. Proceed. VII. 1854-55. 322-326.

Spectroscope On the spectrum of carbon.

Phil. Trans. 1862, p. 221-224.

Chem. Soc. Journ. I. 1863, p. 97-100.

Pharmaceut. Journ IV., 1863, p. 94-97.

Loop On the combinations of Hydrogen with the metalloids.

Journ. de Pharm. XXII., 1836, p. 257-261

Loop Note on the spontaneous ignition of pulverized charcoals

Ann. de Chemie. XLV., 1830. p. 73-84.

Edinburg. Journ. of Science. IV. 1831. 274-7

Roy. Instit. Journ. I., 1831. p. 617-619.

Avogadro, A. & Botto

Meta. Memoir on the relations between the conducting power of liquids for electric currents, and the resulting chemical de-compositions. [1838]

Torino. Mem. Accad. I., 1839. p. 179-218.

Annal. de Chemie, LXXI., 1839, pp. 5-20.

Baillet, A. 7

Baird —

Barlow, Peter, 11.

Barreswill, L. C. A., & Chas. Boudault.

Barthe, E. 1, 2.

Moulds Note on the carbonization of wood & turf.

Journ. des Mines, XI., 1801. p. 253-256.

Mercury An account of the effects of thirty tons of Quicksilver escaping, by the rotting of leather bags, into the bilge water of the Triumph man-of-war.

Nicholson Journ. XXVII., 1810. 132-134.

Gilbert Annal. XL, 1812. p. 347-348.

Loop. On the anomalous magnetic action of iron between the white hot and blood red heat.

Phil. Trans. 1822., 117-126.

Loop. Facts contributing to the history of catalytic force. Decomposition of certain bodies in the benzoic series, under contact.

Journ. de Pharm. V., 1844. 265-268;

Globes Absorbtion of light by glass.

Presse Scientifique 1., 1860 p. 95.

Carbon. On the products extracted from coal tar.

Ph. Sc. 11., 1860, 329-330.

Baudrimont, A. 6. 7.

Baudrimont, Ernest.

Beale, Lionel, S. 5.

Beau de Rochas, Alphonse.

Becquerel, A.C., 8.

Loop Explanation of a phenomenon observed when pouring water on bodies heated to redness.

Annal. de Chemie, LXI., 1836, p. 319-330.

Note on the phenomena of decrepitation.

Comptes Rendus, II., 1836, p. 494-496.

Vacuum Investigation on the comparative duration of the flow of gases.

Journ. de Pharm. XXIX, 1856 p. 266-270.

Loop Method of applying chemical reagents to minute quantities of matter.

Journ. Microsc. Sci. II., 1854 p. 58-59.

Vacuum General formulae for flow of elastic fluids with or without stoppage.

Paris. Comptes Rendus, LVII., 1863. p. 910-913.

Loop On the development of electricity by the contact of two portions of the same metal, in a sufficiently unequal condition of temperature; and on voltaic piles constructed by means of wires of the same metal, and even with but one wire, &c

Annal. de Chemie XXIII., 1823. p. 135-155.

Bede, Emile, 2.

Beetz. 10-3.

——, 14.

——, 16

Vacuum. On the ascent of water, and descent of Mercury. Mercury in capillary tubes.

Bruxelles, Mem. Couronn. XXV., 1851-53.

Loop. On the color (blue) which iron assumes, and the relations which exist between this phenomenon and the passive state presented by the same metal.

Archives de l'Electricité IV., 1844, p. 509-515.

Poggendorff's Annal. LXII., 1844, p. 234-40.

Loop. The action which is produced on the strength of a current by heating and shaking the electrodes.

Pogg. Annal. LXXIX., 1850, p. 98-112.

Dynamo-machine. On the conductivity assumed by insulators on being heated.

Poggend. Annal. XCII., 1854, p. 452-466.

Annal. de Chimie. XLII., 1854, p. 247.

Phil. Mag. VIII., 1854, 191-201

Bellani, Angelo. 26.

Berthelot. Immediate analysis of the different kinds of starch
Chem News, xix, No. 463. Mar. 5, 1869.
464 " 19 "
465 " 25 "

Berthollet, Claude Louis & Vauquelin.

Bertrand, A. & Jamin.

Bischoff Gustav. 21

Loop. Conjectures concerning the property possessed by certain substances, especially platinum, of combining hydrogen and oxigen gases.
Brugnatelli, Giorn. VII, 1824, p. 138-151.

" On spontaneous inflamation of platinum and other substances. &c.
An. Soc. Lomb. Veneto, IV, 1834. p. 227-235, 250-256, 297-302.

Loop. Moulds. On the effect of pressure in modifying the action of heat.
Annal. de Chim. LIX, 1806, p. 170-179.

On condensation of gases on the surfaces of solids.
Paris, Comptes Rendus, XXXVI, 1853, p. 994-998.

Globes. A curious appearance exhibited by certain kinds of glass, when exposed for a length of time to a vacuum.
Pogg. Annal. I, 1824. 397-402.

Böhm, C.

Boutet-Bonfil

Brame, Ch. 6.

Brewster, Sir David, 113.

———, 268.

Furnace, gas. On gas lamps and gas furnaces.
Wien. Sitz. Bericht. XIX., 1856. 3/4. 353.

Carbonizing. Easy decomposition of ammonia, being a new source of hydrogen for the reduction of metallic oxides.
Annal. de Chimie, XXXVI., 1852. p. 225-228

Mercury fumes. On the vaporization of Mercury at ordinary temperatures.
Paris, Soc. Philomath. Proc. Verb. 1849. 98-100

Mercury vapor. On the limit of the vaporization of mercury vapor.
P. Comptes Rendus XXXIX., 1854. p. 1013-1016.

Furnace, gas. Notice respecting a method of producing an intense heat from gas for various purposes in the arts. [1826]
Edinb. Journ. Sci. I., 1829. p. 104-108.

Glass. On the absorption of matter by the surfaces of bodies.
Brit. Ass. Rep. 1855. 42. 49.

Brewster, Sir. David,

Brion, -

Brongniart, Adolphe. 51.

Brunner, Carl. 64.

× On the pressure cavities in Topaz, Beryl and Diamond &c.
Edin. Roy. Soc. Trans. XXIII, 1861, p. 39-44.

Globes. Improved apparatus for generating chemically pure Hydrofluoric Acid.
Liebig Ann. CXI., 1859. 380-382.

Salomon HS. Action of Sulphur on a certain number of organic substances. Paraffine
Comptes Rendus. LVI, 1863, 876-877.

Loop. Micros. Lenses. Report of a memoir of M. Payen, intitled: Complement to a memoir on the chemical composition of vegetable tissue and on the different states of aggregation of such tissues.
Paris, Comptes Rendus, X, 1840, 941-945.

Loop. Preparation of platinum black.
Bern. Mittheil. 1858... 83-85.

" Easy method of preparing perfectly pure platinum black.
Pogg. Ann. CV. 1858 p 496

Buff, Heinrich. 18

—— 49.

—— and Hoffmann.

Bunsen, R. W. 49

Burnett, Sir Wm.

Buck, George & D Cooper.

Vacuum Experiments to on the contraction of liquids
Air pump in their motion through narrow orifices.
Pogg. Ann. XLVI., 1839. 227-242.

Globe. On the electrical conductivity of heated glass.
Platinum wire. Ann. de Chemie XLII, 1854. ~~224-234~~ 125-128.

Decomposition of gaseous compounds by electrical incandescence.
Liebig Annal. CXIII., 1860. 129-150.
Chem. Soc. Journ. XII., 1860. 273-287.

Gladstone On the law of absorption of gases.
Loop. Annal. de Chimie, XLIII, 1858. 496-507.

Mercury An account of the effect of mercurial vapors
vapors. on the crew of H.M.S. "Triumph," 1810.
Phil. Trans. 1823. 402-408.
Tillman. Journ. X., 1826. 181-183.

Fibre

Remarks on the structure of fibre.
Microscop. Journal I., 1842. 257-261.

Chevreul, Michel Eugène, 73.

Claudet, A. 7.

Clifton R.B. and Roscoe.

Clowez S. & Girard.

Vacuum. On the employment of caoutchouc as a means of closing vessels intended to be hermetically closed.
Comptes Rendus, XIV., 1842. 783-785.

Mercury. On the dangers of the mercurial vapours in fumes, the daguerreotype process, and the means of obviating the same.
Brit. Assoc. Rep. 1857. (pt 2) p. 45.

Loops. Carbon spectrum. On the effect of increased temperature upon the nature of the light emitted by certain metals and metallic compounds.
Manchester. Phil. Soc. Proceed. II., 1860-62. p. 227-230.
Chemical News, V., 1862. 233-234.

Air pump. Rubber tube. Note on the presence of chlorine and of sulphur in the natural or ~~artificial~~ manufactured caoutchouc.
Comptes Rendus, L., 1860. 874-876.

Chathupe, Chas. T. 5.

Cohn, Ferdinand. 30.

Congreve, Sir Wm.

Corbett, F. A.

Corenwinder, Benjamin, 1.

——, 12.

Globes On certain modifications of the power of heat and light when transmitted through glass.
Phil. Mag. XXI., 1840. 467-471.

Furnaces On mineral and resin oils.
Bruhau Schles. Gesell. Uebersicht 1855. 264-271.

" Observations on gas light establishments.

Explosions made to determine the comparative explosive force of carburetted hydrogen gas and gunpowder.
Thomp. Ann. Phil. V., 1823. 411-426.

Fibre Indiginous fibrous plants.
Victoria, Trans. Roy. Soc. V. 1860. 205-214.

Vacuum Note on the preparation of nitrogen.

Nitrogen gas. Annales de Chemie. XXVI., 1849. 296-297

" Researches on the assimilation of carbon by the leaves of vegetables.
An. de Chemie. LIV., 1858. 321-356.
